Name : Atharva Ambilwade
PRN : 25070122055
Class : CSE
Batch : 2025-29

Assignment : 29

Subject: Programming with Java

ASSIGNMENT No : 29

TITLE : Write a JSP application to demonstrate the basic concepts of Java Server Pages.

Problem Statement : Write a JSP application to demonstrate the basic concepts of Java Server Pages.

Learning Objectives : To develop dynamic web pages using Java Server Pages.

Theory :

Java Server Pages (JSP) is a server-side technology used for developing dynamic web applications. JSP allows Java code to be embedded within HTML pages using special JSP tags. When a JSP page is requested, the web server automatically translates it into a servlet, compiles it, and executes it to generate dynamic web content. JSP supports implicit objects, directives, scripting elements, expression language, and standard tag libraries. It simplifies web development by separating presentation from business logic. JSP is commonly used with Servlets and JDBC for building database-driven web applications.

Code :

A29.jsp > html

```jsp
<!DOCTYPE html>
<html>
<head>
    <title>JSP Demo for Java Assignment</title>
</head>
<body>

<h2>Java Server Pages Demo</h2>

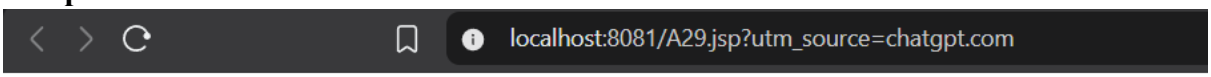

<%
    String name = "Atharva";
%>

<p>Welcome, <%= name %>!</p>

<p>This page is generated using JSP.</p>

</body>
</html>
```

Output :

Java Server Pages Demo

Welcome, Atharva!

This page is generated using JSP.

Conclusion : This program demonstrates Java Server Pages (JSP) by embedding Java code within an HTML page to generate dynamic web content. It declares a variable name using a JSP scriptlet and displays its value using a JSP expression tag. The program shows how JSP combines Java and HTML to create dynamic web pages.

Exercise :

1. **Create a JSP page to display student information entered by the user**

Ans) Code :

A29E1.jsp

```jsp
<!DOCTYPE html>
<html>
<head>
    <title>Student Information</title>
</head>
<body>

<h2>Enter Student Information</h2>

<form method="post">
    Name: <input type="text" name="name" required><br><br>
    Roll No: <input type="text" name="roll" required><br><br>
    Course: <input type="text" name="course" required><br><br>
    <input type="submit" value="Submit">
</form>

<%
    String name = request.getParameter("name");
    String roll = request.getParameter("roll");
    String course = request.getParameter("course");

    if (name != null && roll != null && course != null) {
%>
    <h2>Student Details</h2>
    <p>Name: <%= name %></p>
    <p>Roll No: <%= roll %></p>
    <p>Course: <%= course %></p>
<%
    }
%>

</body>
</html>
```

Output :

Enter Student Information

Name:

Roll No:

Course:

Submit

Student Details

Name: Atharva

Roll No: 55

Course: CSE

2. **Create a JSP application that takes user registration details such as Name, Email, Phone Number, and Password, and displays the submitted information on a result JSP page.**

Sol) Main Code :

A29E2.jsp > html

```
<!DOCTYPE html>
<html>
<head>
    <title>User Registration</title>
</head>
<body>

<h2>User Registration Form</h2>

<form action="result.jsp" method="post">
    Name: <input type="text" name="name" required><br><br>

    Email: <input type="email" name="email" required><br><br>

    Phone Number: <input type="text" name="phone" required><br><br>

    Password: <input type="password" name="password" required><br><br>

    <input type="submit" value="Register">
</form>

</body>
</html>
```

Result.jsp :

Result.jsp > html

```
<!DOCTYPE html>
<html>
<head>
    <title>Registration Result</title>
</head>
<body>

<h2>Registration Successful!</h2>

<%
    String name = request.getParameter("name");
    String email = request.getParameter("email");
    String phone = request.getParameter("phone");
    String password = request.getParameter("password");
%>

<p>Name: <%= name %></p>
<p>Email: <%= email %></p>
<p>Phone Number: <%= phone %></p>
<p>Password: <%= password %></p>

</body>
</html>
```

Output :

User Registration Form

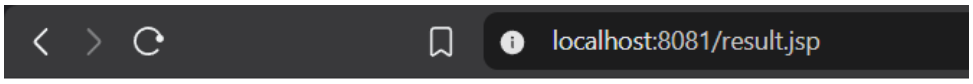

Name: Atharva

Email: atharva@gmail.com

Phone Number: 8275213275

Password: ••••••••••

Register

Registration Successful!

Name: Atharva

Email: atharva@gmail.com

Phone Number: 8275213275

Password: digital123
